

There are lots of ways you can enhance your child's learning at home!

Here is a range of things you could do at home. If your child would like to share anything they have done, please photograph the outcome and email it to the school office.

Children could explore the BBC Bitesize website to learn about light and forces. Then they could experiment with magnets and discover what materials are magnetic at home.

Children could explore a range of Roald Dahl stories and films.

Walk around your local community and explore the natural and manmade features. Children might like to get out and about exploring the natural surroundings.

You could look at OS maps and road atlases and become more aware of how neighbouring communities are linked. They could create their own maps showing places they enjoy visiting in their community, and their walk to school.

Children could find local Somerset recipes, have a go at cooking them at home and tell the class about it back at school.

You could also find out about Hindu gods and goddesses.

Autumn 2020

## Some of the questions that we hope to answer this term.

### Our main topic is Communities and Settlements.

How do people live successfully together in a community?

### Science

How do forces and magnets work?

How are shadows created?

How does light travel through materials?

### RE

What do Hindus believe?

How do they worship?

### English

How does Roald Dahl create successful communities?

How do we use the study of a narrative text to support our own fiction and non-fiction writing?

### Maths

How can we be better mathematicians?

(We will be focusing on place value, addition, subtraction, division and multiplication and working on a range of reasoning and problem solving questions)

### PSHE

What is our role in our community?

How do we manage our feelings and relationships?

### E-Safety

How can we be kind and responsible using technology?

### PE

How can we work together as a team through a variety of passing and receiving games and activities?

## Our Learning Journey

This term, we are working on a recovery curriculum for all subjects. Our theme is 'Communities and Settlements', which has a geography and PSHE focus.

The theme will focus on physical geography from hamlet to city, land use, trade links and natural resources.

We will also focus on human geography. We will look at how communities are created and work together.

This complements the school values of community and friendship which we will be exploring through PSHE throughout the term.

Topic themes will include art, design and technology, music and language activities.

Our main aim is to make sure the children feel safe and secure now they have returned to school.

The term will end with Christmas activities celebrating the season in traditional ways from around Europe.
