

Coronavirus

Coronavirus is a type of flu.

Coronavirus could make people feel:

hot

have a bad cough

hard for them to breath

like they have a bad cold

To stay safe and healthy we all need to:

cough and sneeze into a tissue

Wash hands with soap when:

after coughing and sneezing

when they are dirty

after using the toilet

before cooking

before eating

To keep everyone safe school is closed.

I will stay at home with my family.

This will help everyone to stay safe and healthy.

We all have to do good waiting.

This is ok, my family will tell me when we can go back to school.
